Summary

Frontend Engineer with 6+ years of experience building scalable, modular React and TypeScript applications, exploring AI-powered interfaces and agentic applications. Delivered secure, reusable systems improving efficiency and user experience. Skilled in RBAC, API integration, automated testing, and frontend architecture.

Skills

- **Frontend & Frameworks:** ReactJS, NextJS, JavaScript (ES5, ES6), TypeScript, HTML5, CSS3, SCSS, Tailwind, Bootstrap, Redux, Context API, React Hook Form, Axios, TanStack Query, Webpack, Responsive Web Design
- **Tools & Collaboration:** GitHub, GitBook, ESLint
- **Testing & QA:** Jest, React Testing Library, SonarQube
- **Architecture & Patterns:** Modular Component Design, Micro Frontend, Mono Repo, Separation of Concerns
- **Performance:** Code splitting, Memoization, Lazy loading, Strategic Caching
- **Security:** Authentication Tokens, RBAC, Private Routing, Redirection
- **Computer Science:** DSA, SDLC, OOP, Quality Assurance, Technical Documentation

Professional Experience

- **FHK** — United Arab Emirates
  Senior Front-End Developer — *Mar 2024 – Present*
  - Architected and delivered a secure role-based integrated portal for daily cash operations and incident management, handling hundreds of requests per day with zero downtime.
  - Successfully deployed the system for major **UAE cash-in-transit companies**, including **Transguard** and **CashTrans**.
  - Designed modular frontend systems, separating views and functionality for maintainability and scalability, reducing development and debugging time by 30%.
  - Implemented secure systems with access/refresh token authentication and private routing to enforce enterprise-level access control.
  - Standardized team-wide code quality via ESLint, Prettier, TypeScript, and Tailwind configurations, reducing regression issues by 40%.
  - Ensured high-quality deliverables with unit, integration, and end-to-end tests using Jest, React Testing Library, and SonarQube code analysis, increasing test coverage to 85%.
- **Roomy Technologies** — Islamabad, Pakistan
  Software Engineer L2 — *Dec 2021 – Mar 2024*
  - Engineered a customer-centric high-performance restaurant POS system enabling rapid order placement with real-time Foodpanda synchronization, handling 1000+ orders/day.
  - Integrated third-party APIs for automated order synchronization, reducing manual effort by 50% and minimizing operational friction.
  - Implemented flexible online payment options, supporting credit card, cash, and split payments, increasing successful transactions by 35%.
  - Revamped and optimized legacy applications to improve UI/UX, reduce load time by 40%, and increase performance.

EDUCATION

- **National University of Science and Technology** Islamabad, Pakistan
  Bachelor of Software Engineering *Sep 2017 – May 2021*

CERTIFICATIONS

- **Advanced React - Meta**: View Certificate
- **Introduction to Front-End Development - Meta**: View Certificate
- **Programming with JavaScript - Meta**: View Certificate
- **CSS Certificate - HackerRank**: View Certificate
- **Version Control - Meta**: View Certificate

KEY ACHIEVEMENTS

- **MVP Award**: Awarded Most Valuable Player in the Tech Team by Roomy Technologies in 2023
